

## Audaphon Neo CD 3.0

a produkt from [www.audaphon.de](http://www.audaphon.de)

Small ribbon tweeter for medium and small high-end applications.

The Neo CD 3.0 is a small ribbon tweeter that may be used from 2000 Hz onwards and is suitable for small and slim floorstanding or shelf speakers.

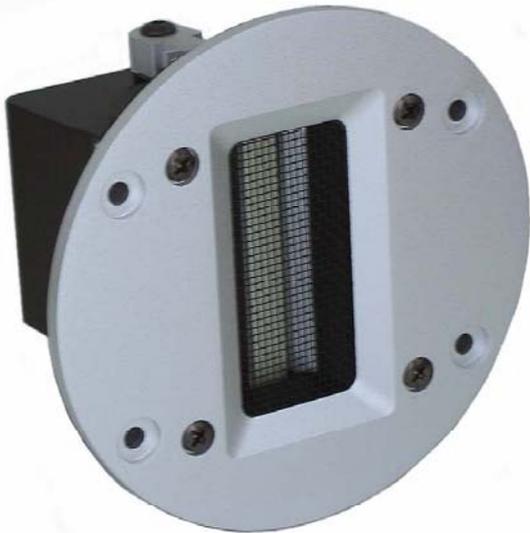

The main features are:

- a remarkably linear frequency response,
- small size and
- an excellent price / performance ratio.

### Review by journal Hobby HiFi 6/2005:

"Linearity of frequency response, omnidirection and excursion show the same perfection as the JP 3.0"

Advanced composite material ribbon diaphragm, which provide high power handling and guarantees a high degree of signal fidelity and broad frequency response. It contains a super strong Neodymium magnet for high efficiency and a build-in impedance conversion transformer.

### Technical Data Audaphon Neo CD 3.0

Ribbon material: ACM\*

Ribbon mass: Aluminium

Ribbon mass: 18 mg

Ribbon dimension 60 x 8 mm

Ribbon thickness 0.02 mm

Ribbon area (Sd): 480 mm<sup>2</sup>

Gap height: 3 mm

Impedance: 7 Ohm

DC resistance Rdc: 0.02 Ohm

Frequency response: 1400 - 40 000 Hz

Sensitivity (1 kHz): 90 dB (2,83V, 1m)

Resonance frequency: 400 Hz

Power Handling: 17/40 W

Recommended crossover: 2,5 kHz / 12 dB

### Dimensions

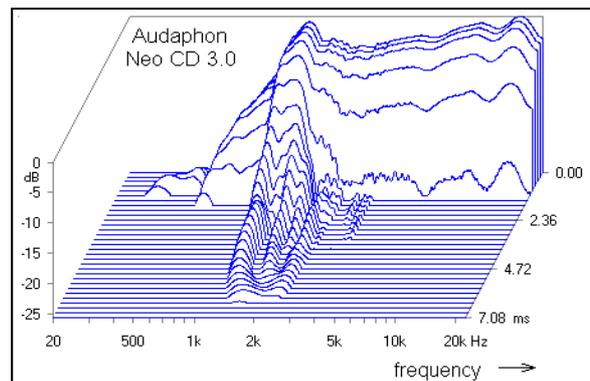

overall diameter (HxW): 110 mm, rund

mounting diameter (HxW): 87/67 x 60 mm

mounting depth (not countersunk): 68 mm

thickness of alu frontplate: 4,5 mm

### Waterfall spectrum

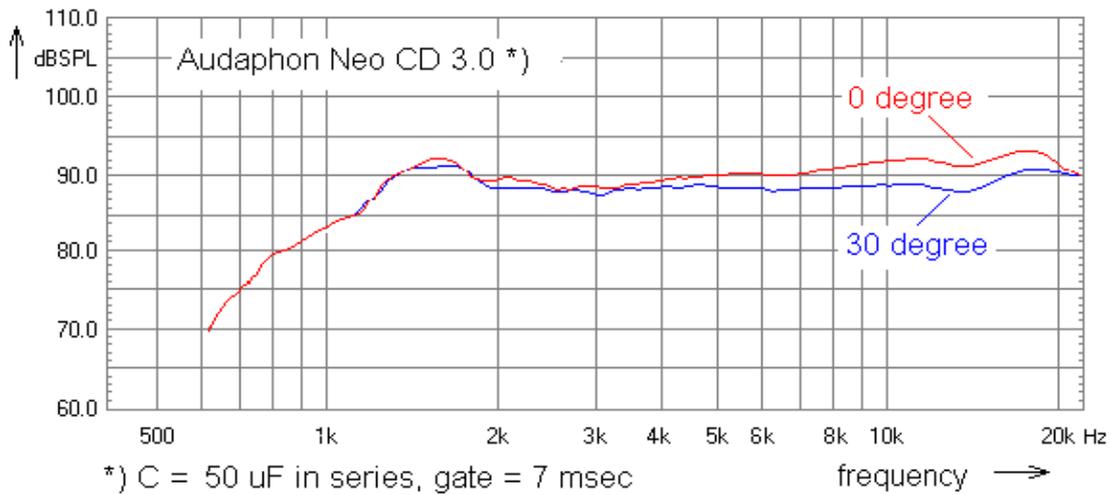

The CD 3.0 displays a magnificent excursion. There is a small resonance at 1230 and 1670 Hz, this is, however, below the crossover frequency when the configured correctly.

### Important note

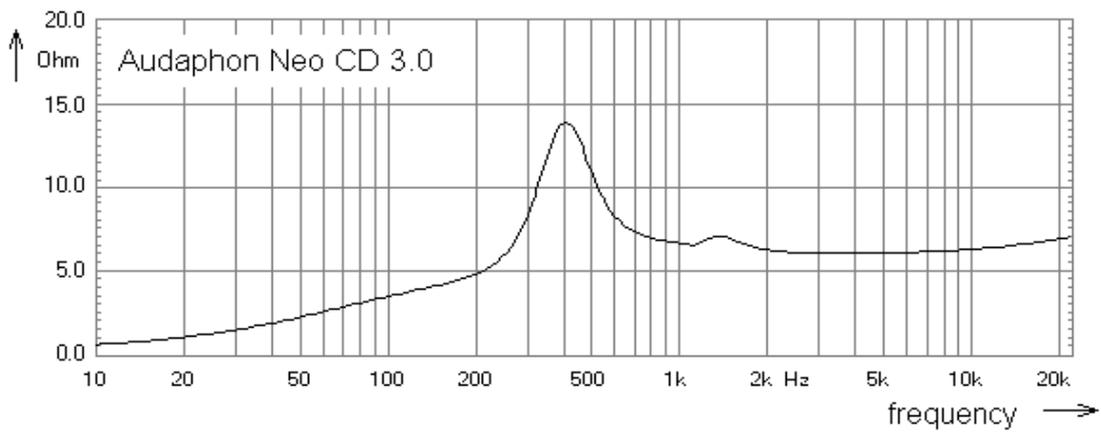

This ribbon is designed for a wide frequency range and, therefore, displays an extreme excursion at lower frequencies. To avoid destruction a crossover is absolutely mandatory.

\*) ACM stands for Advanced Composite Material
